SUMMARY

Recent graduate with strong skills in HTML, CSS, JavaScript, and frameworks such as React.js and Node.js. Trained myself in building dynamic web applications and handling HTTP requests and responses in Express.js. Proficient in using Git for version control, including creating repositories and committing changes. Seeking an entry-level position to leverage my programming skills and contribute to a dynamic development team.

SKILLS

Programming Language:

JavaScript

Markup Language:

HTML and CSS

Frameworks:

React JS, Node JS, Express JS

Databases:

Mysql , MongoDB

PROJECTS

BLOG WEBSITE

<https://github.com/reginaragel/Blog-Website/tree/master>

- Developed a full-stack blogging application using MongoDB, Express.js, React.js, and Node.js
- Implemented user registration and login using JWT for secure authentication. Ensured the application is fully responsive and mobile-friendly using CSS

NOTESAPP

<https://github.com/reginaragel/Notes App-Frontend>

- Created a Notes app, we can use it like a notepad with an extendable input field and also edit the content, we can save the notes that we wrote and view the previous notes.

BOOK SELLING WEBSITE

<https://github.com/reginaragel/Book/tree/master>

- Created a Book selling website using html css and javascript
- Ensured the application is fully responsive.
- Included transitions to enhance the user experience.

CURRENTLY DEVELOPING

- Created a registration system for managing multiple applications.
 - Built a main application page showcasing various apps, similar to Google's homepage.
 - Each app runs with a separate backend for improved scalability
 - Created a bat file to start all applications simultaneously, streamlining the deployment process.
-
